

Ergotron® 200 Series

adding greater range of movement

Highlights

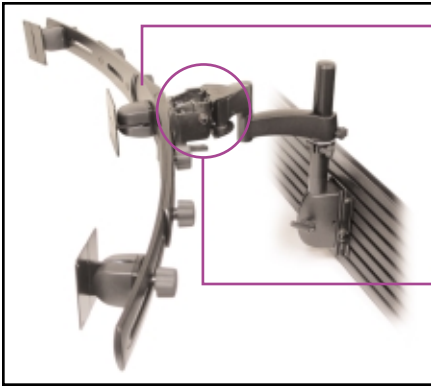

- Arms extend/retract up to 20" when using two* 9" Extensions
- Attach two monitors on one arm with Paraview Technology
- Easily position the angle of your monitor for maximum comfort and productivity
- Handles most flat panel monitors up to 27 lbs (12.2 kg), depending on configuration*
- Interfaces available for virtually any surface or slatwall
- Patented friction system provides smooth, long-life adjustment while maintaining touch-screen stability
- Up to five pivot points, all have independently adjustable friction control for unequalled adjustability
- Rugged construction ensures long-lasting durability
- Cable management system organizes and routes cables neatly
- Designed to interface with Ergotron's vertical adjustment arms
- Interchangeable components let you customize your solution
- 5-year warranty
- VESA® Flat Display Mounting Interface (FDMI™) Standard compliant for easy monitor attachment

Extend/retract, swing, tilt or turn your flat panel monitors for maximum efficiency and ergonomic comfort. Attach your flat panel monitor(s) to a 200 Series Arm and free up desk space while adding greater range of movement. Easily customize a solution from the 200 Series' wide selection of interchangeable components. Use a single Extension or combine more* according to your application needs. Arms fold back out of the way when you need more access to your worksurface.

The 200 Series attaches to virtually any work area: select a Direct Mount, Wall Track, Desk Mount, Pole Mount or Slatwall interface.

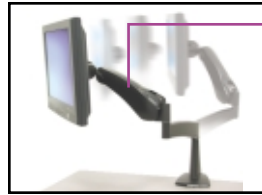

* More than two Extensions can be used if weight of configuration doesn't exceed weight capacity formula. See Orderguide (870-03-005) on our Web site, www.ergotron.com or contact your Ergotron Sales Representative for more information.

Using Ergotron's Paraview Technology, several monitors can be mounted on one arm or stand—efficiently utilizes available space. Each monitor can be individually adjusted.

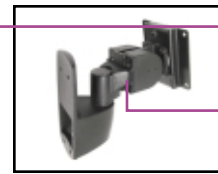

Bow-pivot allows up to 35° of up/down tilt and 360° of clock-rotation.

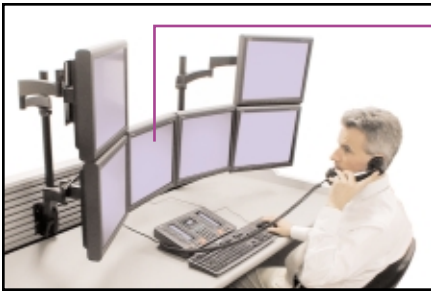

Combine a 300 Series vertical adjustment Arm with a 200 Series Extension for an optimum range of motion.

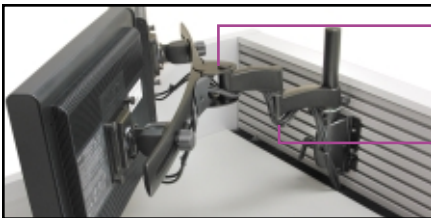

Vertical Mount with 6" Vertical Slide.

Vertical Mount with Single Pivot w/ P/L.

Quad-monitor configuration using Pole Mount Clamps attached to Slatwall.

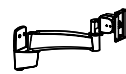

Dual-monitor Pole Mount Clamp mounted to Slatwall.

Organize and route cables through the extensions.
